Project Title: Evaluations of Others

Researcher: Dr. Scott Claessens (University of Kent)

Principal Investigator: Dr. Jim Everett (University of Kent)

This study examines how people evaluate others.

Participation in this study is completely voluntary. This study will take approximately 3 minutes and participation is open to anyone residing in the United Kingdom who is at least 18 years old. You are free to decline to participate, to end participation at any time for any reason, or to refuse to answer any individual question without penalty or loss of compensation.

Participation in this study will involve reading several short scenarios and answering some questions.

Once the study has been completed, we will anonymise the data for analysis. This means that any information that might identify you personally will be removed from the dataset. You may withdraw from the study at any time up until the responses are anonymised (48 hours after your participation). If you choose to withdraw, all of your responses will be deleted. Once the data are analysed a report of the findings may be

submitted for publication. Only broad trends will be reported and it will not be possible to identify any individuals. Personal data will be processed in accordance with the EU General Data Protection Regulation and the UK Data Protection Act (2018).

Should you have any questions about the survey, do not hesitate to contact the head researcher at j.a.c.everett@kent.ac.uk.

Should you have comments or complaints because of this study, you can direct them to the chair of the Ethics Committee of Kent School of Psychology via psychethics@kent.ac.uk

Are you 18 years old or older?

Demographics

Before we begin, please answer some questions about yourself.

How old are you?

How do you describe yourself?

- ☐ Male
- ☐ Female
- ☐ Non-binary / third gender
- ☐ Prefer to self-describe
- ☐ Prefer not to say

AttentionCheck

In studies like ours, there are sometimes a few people who do not carefully read the questions they are asked and just "quickly click through the survey." These random answers are problematic because they compromise the results of the studies. It is very important that you pay attention and read each question. In order to show that you read our questions carefully (and regardless of your own opinion), please answer "TikTok" in the question on the next page.

When an important event is happening or is about to happen, many people try to get informed about the development of the situation. In such situations, where do you get your information from?

- ☐ Twitter
- ☐ Reddit
- ☐ TV
- ☐ Newspapers
- ☐ YouTube
- ☐ Facebook
- ☐ Radio
- ☐ TikTok

Debrief

Thank you for your participation in this study.

In this study, we were interested in how people evaluate individuals who outsource different tasks to other people or to AI, rather than completing the tasks themselves.

Should you have any questions about the survey, do not hesitate to contact the head researcher at j.a.c.everett@kent.ac.uk. If you have any concerns about the ethical conduct of this study, please email psychethics@kent.ac.uk with a description of your concerns.
